

Lab # 2

Object: To become Familiar with OLTP System Design

To create a database of ER Diagram that design in lab1.

Question 1. Create Database for the following case studies:

Q: a The study team identified a preliminary set of 11 entity types that describe the data required by the hospital in support of the various business functions: FACILITY, PHYSICIAN, PATIENT, DIAGNOSTIC UNIT, WARD, STAFF, ORDER, SERVICE/ DRUG, MEDICAL/SURGICAL ITEM, SUPPLY ITEM, and VENDOR. From discussions with hospital staff, reviewing hospital documents, and studying existing information systems, the study team developed a list of business rules describing the policies of the hospital and nature of the hospital's operation that govern the relationships among these entities. Some of these rules follow.

1. A FACILITY maintains one or more DIAGNOSTIC UNITs (radiology, clinical laboratory, cardiac diagnostic unit, etc.).
1. A FACILITY contains a number of WARDs (obstetrics, oncology, geriatrics, etc.).
2. Each WARD is assigned a certain number of STAFF members (nurses, secretaries, etc.); a STAFF member may be assigned to multiple WARDs.
3. A FACILITY staffs its medical team with a number of PHYSICIANS. A PHYSICIAN may be on the staff of more than one FACILITY.
4. A PHYSICIAN treats PATIENTs, and a PATIENT is treated by any number of PHYSICIANS.
5. A PHYSICIAN diagnoses PATIENTs, and a PATIENT is diagnosed by any number of PHYSICIANS.
6. A PATIENT may be assigned to a WARD (outpatients are not assigned to a WARD). The hospital cares only about the current WARD a patient is assigned to (if assigned at all).

7. A PATIENT uses MEDICAL/SURGICAL ITEMS, which are supplied by VENDORS. A VENDOR also provides SUPPLY ITEMS that are used for housekeeping and maintenance purposes.
8. A PHYSICIAN writes one or more ORDERS for a PATIENT. Each ORDER is for a given PATIENT, and a PATIENT may have many ORDERS.
9. An ORDER can be for a SERVICE such as diagnostic test (lab tests such as lipid profile, CBC, liver function tests; diagnostic imaging such as MRIs and X-rays) or a DRUG.

1--16sw173	Facility	Physician	Ward	Patient	Diagnostic Unit	order	Supply Item	Service Drug	MedicalItem	Vendor
	Stand By generator	Dr Awais	Operation Theaatre	Sandeep Jairamani	Laboratory	20	panadol	Injection	Report	peon
nance_schema	special care 24 hours	Dr Fawad	emergency	sanjay	operation	22	Risek	no spa	brufen	dealer

Task 2

1. For each of the descriptions below, perform the following tasks:

Create a database

- a. A book is identified by its ISBN number, and it has a title, a price, and a date of publication. It is published by a publisher, which has its own ID number and a name. Each book has exactly one publisher, but one publisher typically publishes multiple books over time.

Publisher Table

+ Options	
Id number	name
1	Binder Rea
2	Lynn Beigh
1	Binder Rea
2	Lynn Beigh

Book Table

	ISBN numbwe	Title	price	Date Of Publication
<input type="checkbox"/> Edit <input type="checkbox"/> Copy <input type="checkbox"/> Delete	102	Php	200	2015-04-03
<input type="checkbox"/> Edit <input type="checkbox"/> Copy <input type="checkbox"/> Delete	201	AppliedCalculus	280	2010-04-13

B. A piano manufacturer wants to keep track of all the pianos it makes individually. Each piano has an identifying serial number and a manufacturing completion date. Each instrument represents exactly one piano model, all of which have an identification number and a name. In addition, the company wants to maintain information about the designer of the model. Over time, the company often manufactures thousands of pianos of a certain model, and the model design is specified before any single piano exists.

+ Options	
Serial number	MFG completion date
1	2019-04-01
2	2019-03-03

ID number	name
1	new piano
2	Electricity piano

+ Options	
Designer ID	Designer Name
1	0
1	Steinway & Sons
2	Fazioli
3	Bösendorfer

C. A piano manufacturer (see above) employs piano technicians who are responsible for inspecting the instruments before they are shipped to the customers. Each piano is inspected by at least two technicians (identified by their employee number). For

each separate inspection, the company needs to record its date and a quality evaluation grade.

+ Options	
Serial number	MFG completion date
1	2017-05-08
2	2017-07-20
Employee number	
342	
12121	
23	

C. The piano technicians (see above) have a hierarchy of reporting relationships: Some of them have supervisory responsibilities in addition to their inspection role and have multiple other technicians report to them. The supervisors themselves report to the chief technician of the company.

+ Options	
Employee Number	
1561	
1561	
1562	
1562	

d. The entity type STUDENT has the following attributes: Student Name, Address, Phone, Age, Activity, and No of Years. Activity represents some campus-based student activity, and No of Years represents the number of years the student has engaged in this activity. A given student may engage in more than one activity. Draw a logical ERD for this situation. What attribute or attributes did you designate as the identifier for the STUDENT entity? Why?
